DM-F provides comprehensive video input from conventional analog VGA to broad bandwidth digital HDMI and DisplayPort, fulfilling different needs.

#### Benefits of DisplayPort

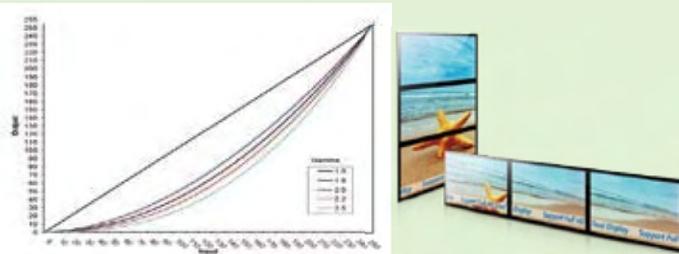

- 17.28 Gbit/s broad bandwidth for faster transmission
- 15M for 1080p 60fps long transmission distance
- Blu-ray disc content support
- Lockable cables against vibration
- Downward convertible for HDMI and DVI

#### Benefits of HDMI

- Single-link bandwidth to 340 MHz (10.2 Gbit/s)
- Blu-ray disc content support
- Downward convertible for DVI

### ■ Gamma Correction - Pursuit of Perfection

Gamma correction enables each panel model follow the specified look-up-table (LUT) in gamma curve doing color adjustment through software encode.

In this way, various monitors can display in an unified color by following Gamma 2.2 standard for PC products, ensuring color consistency for multiple monitor applications.

### ■ 9~36V Wide Range DC Input

Power requirement varies from applications. DM-F series provides 9~36V DC input which simplifies system integration through adapter or DC source.

### ■ OSD Keypad On Back

In order to keep the front simple and clean, DM-F series put membrane keypad on the back, which can also avoid user adjust the setting accidentally.

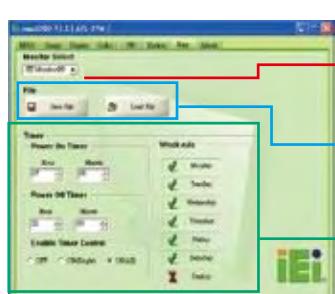

### ■ Cable Cover For Neat Cabling

DM-F series provides optional cable cover, helping users to collect cable neatly.

### ■ SmartOSD Remote Monitor Adjustment

Asides from physical membrane keypad, IEI also provides smartOSD software application helping users to adjust monitor color settings and power management setting from PC control terminal.
