

## Permeability detection

The new Permeability Tester MultiPerm of ExtraSolution is an innovative instrument that allows the simultaneous measurements of the barrier of two different samples. MultiPerm is offered with two sensors, choose among oxygen, water vapour or carbon dioxide. The tester offers high accuracy and an extremely broad testing range of 0,005 – 20000 cm<sup>3</sup>/m<sup>2</sup>/d for Oxygen Permeability, 0,002 - 500 g/m<sup>2</sup>/d for Water Vapour Permeability and 1 – 10000 cm<sup>3</sup>/m<sup>2</sup>/d for CO<sub>2</sub>. These features are achieved by using very sensitive and reliable sensors. The measurements are done completely automated without preliminary preparation of the sample.

The product range includes also the instruments for Oxygen, Water Vapour and CO<sub>2</sub> permeability.

Equipped with the special modular accessories the testers can carry out measurements on packaging containers of various types.

The instruments are distributed by MRS Seitter GmbH, Holzmaden.
