

single wafer packaging

PM400WS 100mm wafer shipper

Through our line of single wafer shippers, we protect and safely transport single wafers from manufacturer to point of use. Our single wafer shippers are ideal for prime or processed wafers. Our expertise in polymer product manufacturing and critical device packaging enables us to provide fast delivery of high quality products at competitive prices.

- Part Number: PM400WS-0615
- For shipping and storage applications
- Securely positions and protects one wafer face up or face down with minimal wafer contact
- Fab qualified polypropylene material has low outgassing characteristics and excellent impact strength
- Convenient tweezer slot locations provide excellent access for insertion or removal of wafers

- Compact and stackable
- Long life living hinge design for durability
- Single latch design allows for easy open and close
- Lower and upper wafer supports are replaceable and securely retain the wafer to minimize particle generation
- Upper and lower supports can be colored for identification purposes
- Overall size: 111.5mm x 111.5mm x 13mm

Companies around the world trust Pozzetta to create secure environments to handle, store, and transport their valuable products.
