HUMIPORT 05/10/20

Humidity / Temperature Hand-Helds

Hand-held measurement of relevant climatic data is becoming more and more important.

Thermo-Hygrometers of the HUMIPORT series set new standards because of the combination of the latest technology and design.

Excellent readability of the very large and illuminated display, the simple thumbwheel operation and the robust case allow the use in tough industrial environments.

The HUMIPORT measures relative humidity [% RH] and temperature [°C or °F] and calculates dew point temperature [°C or °F], absolute humidity [g/m³] and mixing ratio [g/kg or gr/lb].

HUMIPORT10/20 Thermo-Hygrometers are also available in a practical carrying case. The set contains a HUMIPORT, a matching humidity calibration jar, 5 ampoules with calibration fluid (for 80% RH) and an E+E factory certificate.
