

# LIFFS

Fully automatic solution for the filling  
of liquid and pasty products into plastic bags

The FFS-Liquidus is a fully automatic filling machine for filling of liquid and pasty products into plastic bags.

The well-proven Feige product flow control enables to fill the plastic bags in a clean, quick and exactly calibrated way. The compact design which includes all components ranging from the bag manufacturing to the bag discharge enables a very easy machine installation. An adjustment to individual requirements is possible and a wide spectrum of accessories can be integrated.

## Your product data:

Name of the product:

Density [kg/dm³]:

Temperature [°C]:

Viscosity [mPas]: min.:   
max.:

Flow limit (thixotropy):

Product pump available: yes  no

Product flow max. [m²/h]:

Foaming: no

Inflammable: no !

## Your personal data:
