

VESTA® Tank Bottom Valves

Pure Valve Technology made by Tuchenhagen

... now up to DN 65

Process Equipment

GEA Tuchenhagen

100% drained? Yes, for sure!

VESTA® Tank Bottom Valves

The tank bottom valves of the VESTA® series provide complete draining of the tank and ensure that valuable product is in its entirety available.

The integration of a CIP/SIP valve ensures that no product residues remain in the interior of the housing.

The VESTA® Tank Bottom Valve series are available in two versions:

- with detachable, or
- with integrated flange.

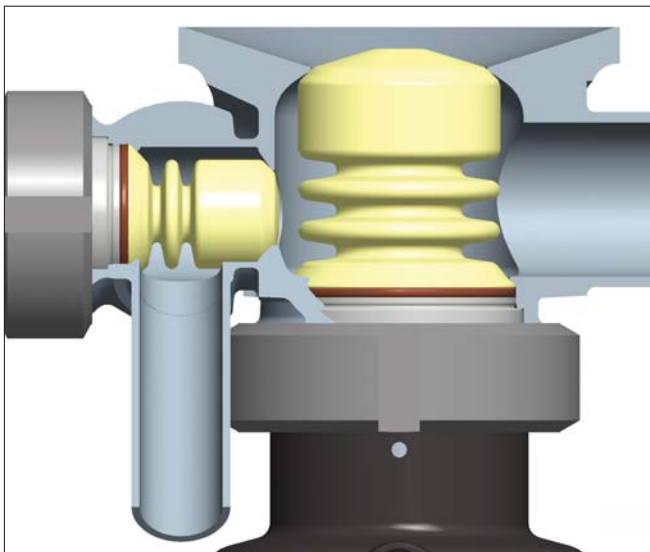

Sizes provided are through nominal diameters DN 65, 3" OD and ISO 76.1.

(Larger nominal diameters available on request.)

Various application options allow for many process opportunities.
