

prime MobileApp

The prime MobileApp for mobile devices with Windows Phone, Android or Apple iOS operating systems allows user to make time recording and access control bookings while on the go.

The prime MobileApp is an extension of the prime WebSystems software. An Internet connection is necessary for bookings to be made. No download or installation is required. The prime MobileApp is called up by the device's browser application.

An icon can be placed on a start page to facilitate fast access to the App. The user rights are stored in prime WebSystems and a licence check is made during login. Usage of the time recording and/or access control areas can be configured individually and rights can be limited as required. The number of devices that can use the prime MobileApp is controlled by the prime WebSystems software licence.

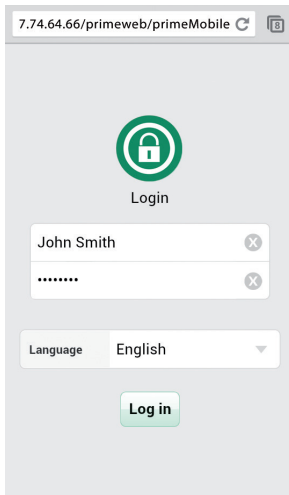

Features

- ▶ Available with prime WebSystems \geq Version 7.20
- ▶ One App for time recording and access control
