60 x 270 cm

90 x 120 cm

90 x 180 cm

90 x 240 cm

**Special dimensions and colours
available on request!**

**Higher performance, reduced
loss of working hours and
fewer accidents through nitrile
workplace mats!**

Prolonged standing on hard surfaces, be it at a work bench, an assembly line or other assembly workplaces, puts strain on the leg muscles and on the spine. In the long run, this can lead to health-related absence from work or even inability to work. You should therefore take preventive measures in good time!

Through their elasticity, the new nitrile rubber mats ease the load on the joints and ensure improved circulation of the leg muscles. **One day's absence saved, and the mat has already paid for itself.**

The flat-topped nap surface ensures a comfortable and safe position and reduces the risk of slipping.

The new nitrile work mats are extremely robust and wear-resistant, and resistant to industrial acids, alkaline solutions and oils. They can be cleaned with all common detergents or steam cleaners.

Flattened edges prevent tripping and facilitate passing over with hoist-trolleys. Let yourself and your staff be convinced by the numerous advantages of the nitrile mat.

You may test it free of charge for 14 days.

You won't find a more risk-free investment!
Simply fill in the fax form overleaf and send it off.
